PROFILE

Computer Science student and backend developer with hands-on experience building database-driven applications using Node.js, Python, PostgreSQL, and SQLite. Led the development of a competitive programming platform and implemented most of its backend. Experienced in team leadership, self-hosted deployment, and teaching Java and Data Structures to over 2000 students. Seeking a backend-focused internship.

EDUCATION Bachelor of Science in Computer Science

King Abdulaziz University, Jeddah, Saudi Arabia | Expected Graduation: 2028

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C++

Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL, SQLite

Tools & Platforms: React, HTML, CSS, Git, Docker, Linux, VS Code

Core Concepts: OOP, Data Structures, Database Design, Problem Solving, Networking Fundamentals

PROJECTS

Competitive Programming Platform (Project Lead & Backend Developer — GDG Club)

Led a student development team in building a full-stack programming competition platform using React, Node.js, Express.js, and PostgreSQL. Developed major the backend functionality, including authentication, competition and problem management, submissions, leaderboard logic, and database integration. Coordinated technical tasks, development decisions, and code integration across the team.

Nutruck Bot (AI Calorie Tracking System)

Developed a Telegram-based calorie tracking system using Python, SQLite, and AI APIs. Implemented meal analysis, nutrition estimation, and user activity tracking through a structured database system. Designed the system for real-world daily meal tracking and nutrition monitoring.

Home Lab Server (Self-Hosted Infrastructure)

Built and managed a self-hosted Ubuntu server to deploy backend applications and services. Utilized Docker, Tailscale, SSH, and monitoring tools to maintain a reliable 24/7 environment for development and deployment.

CoursePath Bot (Academic Resource System)

Developed a Telegram bot that centralizes course materials, slides, and exams for university students. Implemented OTP-based authentication and database-driven content organization. Currently used by 100+ students.

EXPERIENCE

Teaching (Java & Data Structures) 2023 – Present

Provided recorded and live sessions covering Java, OOP, and Data Structures for over 2000 students, focusing on concept simplification, visualization, and debugging support.

Vice Leader – Technology Department, GDG Club 2026 – Present

Lead technical initiatives and coordinate development tasks within the club. Managed the development of a competitive programming platform and supported the planning of workshops, internal systems, and technical events. Mentored team members, reviewed technical decisions, and helped ensure projects were delivered according to the club's requirements.
